

THE NEIGHBORHOOD WATER® ALLIANCE

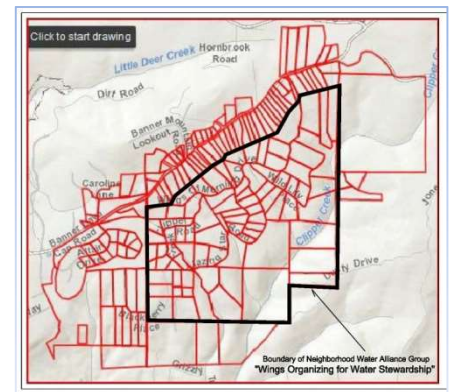

An Operation Unite® Outreach

The **NEIGHBORHOOD WATER ALLIANCE** program establishes water contingencies and alternatives for neighborhoods.

A **NEIGHBORHOOD WATER ALLIANCE** creates water contingencies and alternatives by building collaboration and adaptability into neighborhoods. Individual water supply vulnerability can be reduced by bringing neighbors within a neighborhood together to support neighborhood goals for utilizing the available resources.

Do you really need to work together?

Our families and neighborhoods need water every day. Our lives become dysfunctional, from a practical perspective, if we don't have a consistent water supply. A **NEIGHBORHOOD WATER ALLIANCE** group recognizes that each water well and property is vulnerable in different ways. These physical differences between properties can actually strengthen water supply reliability if neighbors work together. **NEIGHBORHOOD WATER ALLIANCE** groups realize that protection and long-term reliability of the local groundwater resource needs to be effectively and properly managed together.

So, create an Operation Unite® **NEIGHBORHOOD WATER ALLIANCE** in your neighborhood.

- **You are not alone anymore**
- **You are much stronger and resourceful as a group**
- **Your exposure to losing your water supply is significantly reduced**
- **You define the goals of the neighborhood**

Protect your neighborhood. **START A NEIGHBORHOOD WATER ALLIANCE** group in your neighborhood.
